SUMMARY

Full-Stack Software Engineer with 3 years of professional experience building and delivering production systems end-to-end with Angular and ASP.NET Core. Comfortable owning features from database and REST API design through to polished, responsive user interfaces. Background spans startup product development, mission-critical full-stack systems built during military service, and freelance full-stack delivery. Strong foundation in Clean Architecture, SOLID principles, and RESTful API design; seeking a Full-Stack .NET Consultant role to apply this end-to-end expertise to real

SKILLS

- **Frontend Architecture & Angular Ecosystem:** Angular, TypeScript, RxJS, NgRx, SSR, Angular Material, PrimeNG, NgBootstrap
- **Backend Development & .NET Ecosystem:** C#, ASP.NET Core, ASP.NET Core Web API, Entity Framework Core, LINQ, ASP.NET Core Identity, JWT, SignalR, RESTful APIs, SQL Server
- **Architecture & Software Engineering:** N-Tier Architecture, Clean Architecture, OOP, Data Structures, Algorithms, SOLID Principles, Design Patterns
- **UI Development & Styling:** HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Responsive Design
- **Animations & UI Enhancement:** GSAP, Anime.js
- **Version Control & Collaboration:** Git, GitHub, Gitea

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Angular & .NET) — FOE — Military Service

End-to-end full-stack ownership: designed and built .NET back-end services and Angular front-ends for real operational systems used across military sectors.

- Built full-stack Angular & .NET systems for soldiers' transfer orders, including document generation, API-based execution, and automated status-tracking notifications.
- Developed "Reminder," a full CRUD web app (Angular, Firebase, SCSS) to notify officers of soldiers' locations after missions.
- Built enlisted-personnel management systems handling data import, nationwide distribution, and cross-sector integration.
- Developed tracking and reporting systems for sector operations and civilian affairs, with full CRUD functionality and structured report generation.
- Designed a data-normalization system to standardize and match Arabic-language records across multiple sector systems.
- Deployed on secure local military servers; source code is confidential — demos available on request.

Full-Stack Developer (Angular & ASP.NET Core) — Freelance

- Afkar Platform: Built a full-stack job platform with Angular and ASP.NET Core — RESTful APIs, authentication, job browsing, and job-application workflows.
- Ennwy E-Commerce: Built a full-stack e-commerce application with Angular and ASP.NET Core — RESTful APIs, product management, product details, shopping cart, and responsive UI components.

Front-End Developer (Angular) — X-BLEND

Cairo, Egypt | 10/2024 – 03/2026
Delivered Angular-based front-end solutions across multiple client projects in a startup environment, including AR-Room, Al-Motafwq, AZ-Accounting, BWT, and Business Step.

- **AR-Room:** Developed a web-scraping tool in Angular to aggregate products from multiple e-commerce platforms; enhanced UI/UX with PrimeNG and SCSS, driving a 30% increase in user engagement.
- **Al-Motafwq:** Engineered interactive learning features and teacher–student portals using Angular and NgRx for state management, boosting student engagement by 25%.
- **AZ-Accounting:** Built automated financial-tracking and budget-management tools with Angular and Angular Material, reducing accounting processing time by 20%.
- **Business Step:** Designed and built a fully responsive corporate website with Angular and Bootstrap, improving the company's online presence and lead generation through optimized contact forms.
- **BWT:** Contributed to an Angular-based platform, focusing on a clean, maintainable codebase following SOLID principles and cross-browser compatibility.

EDUCATION

Bachelor of Science, Computer Science — *Benha University, Egypt* 2020 – 2024

CERTIFICATES

- **Front-End Web Development:** Route IT Training Center, ITI IT Training Center, Microsoft IT Training Center
- **Back-End Development:** Route IT Training Center, ITI IT Training Center
- **Angular Framework Expertise:** Maximilian Schwarzmüller – Angular: The Complete Guide; Angular University – Advanced Angular Development (Udemy)

LANGUAGES

- **Arabic:** First Language
- **English:** B2

PROJECTS — FULL-STACK & BACKEND

- **[MVCProjects](#):** A collection of practical ASP.NET Core MVC projects covering Razor Views, Entity Framework Core, CRUD operations, authentication, authorization, and database integration. *(repo updated regularly with new practice projects)*
- **[FullStackProjects](#):** Full-stack projects built with Angular and ASP.NET Core, covering RESTful APIs, authentication, Entity Framework Core, SignalR, and real-time communication. *(repo updated regularly with new practice projects)*
- **[Full-.NET](#):** Backend-focused .NET projects covering Web APIs, Entity Framework Core, ASP.NET Core Identity, JWT authentication, and SQL Server.

PROJECTS — FRONT-END

- **[Quiz App](#):** A quiz platform with separate student and instructor portals, built with Angular, GSAP, Angular Material, and PrimeNG.
- **[Project Management System](#):** A Trello-inspired collaboration tool with task-tracking, built with Angular, GSAP, and Angular Material.
- **[Hotel System](#):** An Angular application with authentication, booking functionality, and separate admin and client layouts.
- **[Foody](#):** An Angular application with an admin dashboard and client layout for managing food-related content.
- **[Weather Website](#):** A responsive site for exploring global weather patterns, built with HTML, CSS, and Bootstrap.
- **[Box-Shadow Generator](#):** A small utility tool for customizing CSS box-shadow effects.
- **[Image Editor](#):** An online image editor built to improve everyday image-editing workflows.
- **[Problem Solving](#):** A curated collection of JavaScript solutions for coding challenges, showcasing problem-solving ability.
- **[JS Ideas](#):** A repository of innovative JavaScript ideas, highlighting creativity and practical coding skills. *(repo updated regularly with new ideas)*
- **[Ib-dev-lab](#):** A portfolio-style Angular project showcasing interactive UI components and front-end experiments, continuously expanded with custom components originally built for coding tutorials and CSS Battle challenges.
